PROFILE SUMMARY

Results-oriented Data Analyst with a BSc in Mathematics (Second Class Honours, Upper Division, University of Nairobi) and hands-on experience across statistical analysis, data cleaning, and reporting. Proficient in SQL, Excel, Power BI and Python, with a self-built portfolio of six end-to-end analytics projects covering fraud detection, risk modelling, customer attrition, and predictive scoring. Brings a strong analytical foundation from a data attachment at the Kenya National Bureau of Statistics and client-facing experience in banking, combining technical skill with the ability to translate complex data into clear, actionable insight for any industry. Continuously learning and improving my analytical skills, and looking to bring that curiosity to new sectors and problems.

CORE SKILLS & TOOLS

- **Data Analytics:** SQL (MySQL), Microsoft Excel, Power BI, Python (Pandas, NumPy, Matplotlib, Seaborn)
- **Excel:** Power Query, Pivot Tables, SUMIFS, XLOOKUP, VLOOKUP, Advanced Formulas, Dashboard Development
- **Power BI:** DAX Measures, Conditional Formatting, KPI Cards, Live Database Integration, Interactive Dashboards
- **Python:** Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook, OpenPyXL
- **Survey Tools:** KoboToolbox (form design, skip logic, validation, data export to Excel)
- **Analytical Methods:** Risk and Anomaly Detection, Customer Behaviour Analysis, Portfolio Analysis, Predictive Scoring
- **Soft Skills:** Analytical Thinking, Problem Solving, Client Communication, Attention to Detail, Fast Learner

WORK EXPERIENCE

Direct Sales Executive | I&M Bank | 16 April 2026 to Present

- Track and analyse daily, weekly, and monthly sales performance data against targets to identify trends and improve results.
- Market and sell personal banking, credit cards, and consumer products to new and existing customers.
- Generate and qualify new sales leads, then organise and prioritise outreach to prospects.
- Review client documentation for accuracy and completeness before submission for processing.
- Cross-sell additional products to existing clients based on their usage patterns and needs.
- Represent the bank at field marketing and promotional events, gathering customer feedback on the ground.

Direct Sales Representative | HF Group | 2 April 2025 to 14 April 2026

- Analysed customer bank statements to assess financial behaviour and support data-driven loan decisions.
- Guided customers through account opening and loan documentation, ensuring full compliance accuracy.
- Collected and synthesised customer feedback to inform service delivery and product improvements.
- Built and maintained client relationships to support retention and business development goals.
- Consistently met sales targets across multiple product lines in a high-pressure environment.

Data Analyst Attachee | Kenya National Bureau of Statistics (KNBS) | 3 May 2022 to 30 August 2022

- Collected, cleaned, and organised large datasets for statistical analysis and national survey reporting.
- Reviewed datasets for accuracy, completeness, and consistency across multiple data sources.
- Prepared statistical summaries and data visualisations to support evidence-based national reporting.
- Used statistical software and spreadsheet tools to improve data quality and streamline workflows.
- Participated in field data verification as part of national quality assurance processes.

PORTFOLIO PROJECTS

Six end-to-end analytics projects demonstrating range across four tools (built on banking datasets; techniques apply across industries):

- **Fraud Detection Monitoring System (SQL, MySQL):** 5 business questions, 4 reusable SQL views, KES 2.60M in flagged transactions identified
- **Risk Intelligence System (SQL, MySQL):** Exposure, collateral coverage, and branch level default risk analysis
- **Portfolio Risk Analysis (Excel, Power Query):** 2,000 records analysed for concentration, exposure, and default risk
- **Customer Attrition & Engagement Dashboard (Excel, Power Query):** KES 186M revenue at risk identified, 20.4% churn rate, engagement driver analysis
- **Live Monitoring Dashboard (Power BI, MySQL, DAX):** 3 page interactive dashboard, KPI cards, conditional formatting, 6 DAX measures
- **Customer Scoring Model (Python, Pandas, Seaborn):** Weighted scorecard on 1,000 records, 300 to 850 scale, automated decision output
- **Additional: Soap Brand Survey (KoboToolbox, Excel, PowerPoint):** Built and deployed a survey form with skip logic and validation, collected responses, analysed them with pivot tables and presented findings in charts

EDUCATION

Bachelor of Science (Mathematics) | University of Nairobi
9 September 2019 to 22 September 2023 | Graduated: 22 September 2023
Second Class Honours, Upper Division

TRAINING & CERTIFICATIONS

- AWS AI Practitioner Challenge, Udacity (June 2026)
- Python for Data Science and Machine Learning Bootcamp, Udemy (August 2026 to September 2026)
- Master SQL for Data Science, Udemy (July 2026)
- Business Analytics with Excel, Simplilearn (March 2023)
- Machine Learning, Simplilearn (February 2023)
- Statistical Packages, Mathematics Association, University of Nairobi (January 2021 to April 2021)

LANGUAGES

English (Professional Proficiency) | Swahili (Native)
